THE MISSION OF ST. JUDE CHILDREN’S RESEARCH HOSPITAL® IS TO FIND CURES FOR CHILDREN WITH CANCER AND OTHER DEADLY DISEASES THROUGH RESEARCH AND TREATMENT. ST. JUDE IS DEDICATED TO THE BELIEF OF OUR FOUNDER THAT “NO CHILD SHOULD DIE IN THE DAWN OF LIFE.”

ALSAC IS THE FUNDRAISING AND AWARENESS ORGANIZATION FOR ST. JUDE. ALSAC’S SOLE MISSION IS TO RAISE THE FUNDS AND AWARENESS NECESSARY TO OPERATE AND MAINTAIN ST. JUDE.
Brennan needed four bone marrow transplants. Six-week-old Apollos had a massive brain tumor. Alexis needed an entirely new type of treatment to fight her cancer.

Their families turned to St. Jude Children’s Research Hospital.

At St. Jude they found a hospital unlike any other, where cutting-edge research into childhood cancer and other deadly diseases is brought together with extraordinary patient care and unparalleled family support. We are turning laboratory breakthroughs into lifesaving treatments for children—every day—and never send a bill to patient families.

THERE ARE GREAT RESEARCH INSTITUTIONS, GREAT HOSPITALS AND GREAT CHARITIES. WE ARE ALL THREE. WE ARE FINDING CURES AND SAVING CHILDREN.

You can help. Find out how at stjude.org.
Dear Friends,

When our father, Danny Thomas, opened St. Jude Children’s Research Hospital more than 50 years ago, little did he dream that his desire to help desperately ill children would touch the lives of so many people.

In communities all across this country—indeed, all around the world—St. Jude is a champion for families who only want their beloved children to be well, and to put to an end, once and for all, the threat that childhood cancer and other diseases pose to their children’s lives.

That’s because, at St. Jude, doctors and scientists are making breakthroughs every day that benefit children. During just this past year, because of our genome project, they shed new light on our understanding of deadly childhood diseases and created new ways to treat them. Then, as always, they shared that knowledge so doctors and scientists everywhere can use that information to save children. At the same time, they continued working hard to make sure every child can enjoy the best quality of life possible—and a future full of hope and promise.

None of this would be possible without you. We are so very thankful for your steadfast support and incredible generosity, and for your passion for helping us reach the day our father dreamed of—the day when no child will die in the dawn of life.

God bless the children,

Marlo, Terre and Tony Thomas
PATIENT CARE
PATIENT CARE
CHILD-CENTERED, FAMILY-FOCUSED

At St. Jude, providing the best in patient care means treating the whole child, not just a disease. It means not only finding the best treatment plan for each child, but also working to discover why he or she got sick. And it means looking at the long-term effects of treatment and taking every possible precaution and providing every possible service to ensure each patient enjoys the best quality of life.

And families never receive a bill from St. Jude—not for treatment and not even for transportation to the hospital or food and housing once they arrive.

THANKS TO THE GENEROSITY OF DONORS, NO FAMILY EVER PAYS ST. JUDE FOR ANYTHING.
TREATMENTS INVENTED AT ST. JUDE HAVE HELPED PUSH THE OVERALL CHILDHOOD CANCER SURVIVAL RATE FROM 20% IN 1962 TO 80% TODAY.

WE ARE WORKING TO DRIVE THE OVERALL SURVIVAL RATE TO 90% IN THE NEXT DECADE. WE WON’T STOP UNTIL NO CHILD DIES FROM CANCER.

ST. JUDE TREATS PATIENTS FROM ALL 50 STATES & AROUND THE WORLD.
In 2009, at the tender age of 7, Brennan was diagnosed with a rare and deadly subtype of acute myeloid leukemia. Three bone marrow transplants—one at a local hospital and two at St. Jude—failed to stop the aggressive cancer, and in 2011, his parents decided to pursue Brennan’s only remaining hope—a risky fourth transplant with cells harvested from his mother’s marrow.

**ONLY ST. JUDE WOULD HAVE ATTEMPTED A FOURTH TRANSPLANT. THE TRANSPLANT SAVED BRENNAN’S LIFE, AND WHAT ST. JUDE HAS LEARNED FROM BRENNAN WILL HELP OTHER CHILDREN.**

“BECAUSE THEY WERE WILLING TO TAKE A RISK ON MY SON, THERE ARE OTHER CHILDREN WHO ARE ALIVE NOW.”

—TURNER
BRENNAN’S FATHER
DANCING IN THE HALLS

St. Jude is a place of joy, where children dance to the sounds of visiting musical groups, trick or treat in the hallways every Halloween, or pelt their doctors with Silly String in a summer “war” on the campus. At St. Jude, we let kids be kids.

MAE

WILMS TUMOR

CONTINUING CARE

At St. Jude, our care doesn’t end when treatment is done. Our After Completion of Therapy clinic is the largest long-term follow-up clinic for childhood cancer patients in the U.S.—and we do this at no cost to patients. The clinic helps patients stay healthy after active treatment ends, and has served as a prototype for other follow-up programs.

SUPPORTING SURVIVORS

St. Jude is a pioneer in studying the effects of treatment in adults who survived childhood cancer. Through our St. Jude LIFE study, we’re monitoring more than 2,600 people who were treated at St. Jude. We’re finding out how their treatment is affecting their health as adults, looking for ways to lessen long-term side effects, and helping survivors understand their health risks.

CELEBRATING MILESTONES

A diagnosis of cancer can totally disrupt the lives of patients and their families. But that shouldn’t put a halt to celebrating life’s moments of joy and accomplishment—patients should not have to miss their high school prom or their kindergarten graduation. At St. Jude, they don’t have to.

TREATING THE WHOLE CHILD

Learning and Growing

Part of childhood’s normal routine is going to school, and the St. Jude School Program Presented by Target gives patients a way to focus on the future and keep up with schoolwork. St. Jude teachers work with patients’ home schools to help them stay the course with their classmates, whether that’s learning to read or preparing for college entrance exams.

Telling Unique Stories

The St. Jude Legacy Bead Program was designed specifically to address the challenges faced by our patients and provide a way for them to visualize their experiences at St. Jude. Patients receive a bead for every procedure and treatment they undergo, stringing them together into a unique story that can be shared with family and friends.

Coping with Treatment

Being sick can mean being scared—of needles and medical tests and treatment. The Child Life specialists at St. Jude help children understand—at their own age levels—what to expect at the hospital, helping to relieve their stress and anxiety.

BUILDING LEGACIES

Writing music, creating a documentary or stretching a voice to reach the high notes—these are just some of the ways our teen patients are encouraged to express their feelings and fears, and share their special individuality.

TELLING UNIQUE STORIES

ST. JUDE IS A PLACE OF JOY, WHERE CHILDREN DANCE TO THE SOUNDS OF VISITING MUSICAL GROUPS, TRICK OR TREAT IN THE HALLWAYS EVERY HALLOWEEN, OR PELT THEIR DOCTORS WITH SILLY STRING IN A SUMMER “WAR” ON THE CAMPUS. AT ST. JUDE, WE LET KIDS BE KIDS.

SUPPORTING SURVIVORS

ST. JUDE IS A PIONEER IN STUDYING THE EFFECTS OF TREATMENT IN ADULTS WHO SURVIVED CHILDHOOD CANCER. THROUGH OUR ST. JUDE LIFE STUDY, WE’RE MONITORING MORE THAN 2,600 PEOPLE WHO WERE TREATED AT ST. JUDE. WE’RE FINDING OUT HOW THEIR TREATMENT IS AFFECTING THEIR HEALTH AS ADULTS, LOOKING FOR WAYS TO LESSEN LONG-TERM SIDE EFFECTS, AND HELPING SURVIVORS UNDERSTAND THEIR HEALTH RISKS.

CELEBRATING MILESTONES

A DIAGNOSIS OF CANCER CAN TOTALLY DISRUPT THE LIVES OF PATIENTS AND THEIR FAMILIES. BUT THAT SHOULDN’T PUT A HALT TO CELEBRATING LIFE’S MOMENTS OF JOY AND ACCOMPLISHMENT—PATIENTS SHOULD NOT HAVE TO MISS THEIR HIGH SCHOOL PROM OR THEIR KINDERGARTEN GRADUATION. AT ST. JUDE, THEY DON’T HAVE TO.

TREATING THE WHOLE CHILD

LEARNING AND GROWING

PART OF CHILDHOOD’S NORMAL ROUTINE IS GOING TO SCHOOL, AND THE ST. JUDE SCHOOL PROGRAM PRESENTED BY TARGET GIVES PATIENTS A WAY TO FOCUS ON THE FUTURE AND KEEP UP WITH SCHOOLWORK. ST. JUDE TEACHERS WORK WITH PATIENTS’ HOME SCHOOLS TO HELP THEM STAY THE COURSE WITH THEIR CLASSMATES, WHETHER THAT’S LEARNING TO READ OR PREPARING FOR COLLEGE ENTRANCE EXAMS.

TELLING UNIQUE STORIES

THE ST. JUDE LEGACY BEAD PROGRAM WAS DESIGNED SPECIFICALLY TO ADDRESS THE CHALLENGES FACED BY OUR PATIENTS AND PROVIDE A WAY FOR THEM TO VISUALIZE THEIR EXPERIENCES AT ST. JUDE. PATIENTS RECEIVE A BEAD FOR EVERY PROCEDURE AND TREATMENT THEY UNDERGO, STRINGING THEM TOGETHER INTO A UNIQUE STORY THAT CAN BE SHARED WITH FAMILY AND FRIENDS.

COPING WITH TREATMENT

BEING SICK CAN MEAN BEING SCARED—OF NEEDLES AND MEDICAL TESTS AND TREATMENT. THE CHILD LIFE SPECIALISTS AT ST. JUDE HELP CHILDREN UNDERSTAND—AT THEIR OWN AGE LEVELS—WHAT TO EXPECT AT THE HOSPITAL, HELPING TO RELIEVE THEIR STRESS AND ANXIETY.

BUILDING LEGACIES

WRITING MUSIC, CREATING A DOCUMENTARY OR STRETCHING A VOICE TO REACH THE HIGH NOTES—THESE ARE JUST SOME OF THE WAYS OUR TEEN PATIENTS ARE ENCOURAGED TO EXPRESS THEIR FEELINGS AND FEARS, AND SHARE THEIR SPECIAL INDIVIDUALITY.

ONLY ST. JUDE 2013 ANNUAL REPORT | Page 14
In February 2013, the project was recognized by TIME magazine as one of the top 100 new scientific discoveries.

The pediatric cancer genome project continues to generate new scientific breakthroughs, as St. Jude focuses on an area of genomic science that few other organizations are pursuing: finding mutations in the regulatory regions of genes as well as other mechanisms that turn genes on and off.

In 2014, St. Jude plans to begin sequencing the genome of every St. Jude cancer patient in an effort to discover the best ways to tailor each child’s treatment and achieve better outcomes.
IN 2015, ST. JUDE WILL BEGIN TREATING PATIENTS IN THE NATION’S FIRST PROTON THERAPY CENTER DEDICATED SOLELY TO CHILDREN.

Proton therapy is more powerful in destroying cancer, because it can be used to deliver a higher dose of radiation to the tumor.

Proton therapy reduces harmful side effects, because the radiation does not continue beyond the tumor. This spares normal tissue and vital organs from exposure, which is critical in a developing child.
ACADEMIC RESEARCH TURNING LABORATORY BREAKTHROUGHS INTO LIFESAVING TREATMENTS

St. Jude is the epicenter for the latest innovations in research and treatment of childhood cancer and other deadly diseases, sharing our results in 800 articles published in FY13.

OUR DOCTORS AND SCIENTISTS ARE CHANGING THE WAY THE WORLD UNDERSTANDS CANCER AND OTHER DEADLY CHILDHOOD DISEASES, AND ULTIMATELY, HOW CHILDREN EVERYWHERE ARE TREATED FOR THESE DISEASES— AND CURED.

For children facing the fight of their lives, the research breakthroughs made only at St. Jude offer hope for long and healthy lives.

For more information about the medical and scientific breakthroughs at St. Jude, please see the St. Jude Scientific Report at stjude.org/stjudepublications.

ABNORMAL GENE LAUNCHES RARE LEUKEMIA

The St. Jude Children’s Research Hospital-Washington University Pediatric Cancer Genome Project announced a discovery that provides insight into the causes of acute megakaryoblastic leukemia, which has very low long-term survival rates. The research findings could pave the way for better testing and treatment plans for children fighting this cancer.

Cancer Cell | November 2012

EXISTING DRUGS OFFER NEW TREATMENT OPTIONS

A new study led by St. Jude identified genetic changes in a subtype of acute lymphoblastic leukemia that could lead to improved treatments for children with that disease. The study shows some patients might benefit from existing targeted therapies.

Cancer Cell | August 2013

NEW MUTATIONS TO BLAME FOR BRAIN TUMOR SUBTYPE

The St. Jude Children’s Research Hospital-Washington University Pediatric Cancer Genome Project announced findings that could lead to better treatments for children diagnosed with low-grade glioma, the most common childhood tumor of the brain and spinal cord. The research identifies most of the genetic mistakes that lead to these tumors.

Nature Genetics | April 2013

CHILDHOOD CANCER SURVIVORS HAVE UNDIAGNOSED DISEASE AS ADULTS

A St. Jude study provided the most complete picture yet of adult survivors of childhood cancer and their health risks, underscoring the need for lifelong medical follow-up. St. Jude found that childhood cancer survivors experience a significant amount of undiagnosed, serious disease through their adult years.

The Journal of the American Medical Association | June 2013

INHERITED GENETIC VARIATIONS IMPACT LEUKEMIA RISK

A study led by St. Jude scientists found that children who inherit certain variations of four specific genes have a much higher risk of developing acute lymphoblastic leukemia, the most common childhood cancer. The report offers new insight into higher ALL rates among Hispanic children.

Journal of the National Cancer Institute | March 2013

ABNORMAL GENE LAUNCHES RARE LEUKEMIA

The St. Jude Children’s Research Hospital-Washington University Pediatric Cancer Genome Project announced a discovery that provides insight into the causes of acute megakaryoblastic leukemia, which has very low long-term survival rates. The research findings could pave the way for better testing and treatment plans for children fighting this cancer.

Cancer Cell | November 2012

EXISTING DRUGS OFFER NEW TREATMENT OPTIONS

A new study led by St. Jude identified genetic changes in a subtype of acute lymphoblastic leukemia that could lead to improved treatments for children with that disease. The study shows some patients might benefit from existing targeted therapies.

Cancer Cell | August 2013
DESPITE THIS PROGRESS, CANCER REMAINS THE LEADING CAUSE OF DEATH BY DISEASE IN CHILDREN OVER THE AGE OF 1 IN THE U.S. AND THE NEED TO FIND BETTER TREATMENTS REMAINS CRITICAL. THE DOCTORS AND SCIENTISTS AT ST. JUDE ARE COMMITTED TO FINDING THOSE CURES.

A tumor that arises in the brain
A malignant tumor of the retina
The most common tumor in infants younger than 1 year of age and a common solid tumor of childhood
A cancer characterized by progressive enlargement of affected lymph nodes and sometimes spreads to the spleen, liver, bone marrow, bones or lungs
The most common form of childhood cancer affecting lymphocytes, a type of white blood cell
The most common type of bone cancer in children and adolescents, occurring most often in the bones on either side of the knee and in the upper arm

*Based on national averages from 2001—2007
**Reflects survival rate at St. Jude, standard risk and high risk, the highest among national cooperative group trials for medulloblastoma
***Reflects survival rate at St. Jude, the highest worldwide for ALL

INTERNATIONAL LEADERSHIP
INTERNATIONAL LEADERSHIP
SAVING CHILDREN EVERYWHERE

The mission of St. Jude is to find cures and save children—and that mission has no boundaries.

ST. JUDE FREELY SHARES ITS BREAKTHROUGHS, SO ONE CHILD SAVED AT ST. JUDE MEANS DOCTORS AND SCIENTISTS AROUND THE WORLD CAN USE THAT KNOWLEDGE TO SAVE THOUSANDS MORE CHILDREN.

St. Jude doesn’t stop there. Through its International Outreach Program and an innovative website, cure4kids.org, St. Jude reaches out to health care professionals across the globe. St. Jude pioneered a cooperative, partnership approach that pairs St. Jude leaders with local community leaders and health care providers in developing countries—sharing knowledge and expertise that can help improve diagnosis and treatment.
In June 2013, the inaugural St. Jude International Forum was held in Memphis, bringing together the foundations that support St. Jude International Outreach Program sites to share experiences and ideas related to patient care, fundraising and awareness.

In 2014, ST. JUDE WILL OPEN A STATE-OF-THE-ART GLOBAL EDUCATION AND COLLABORATION CENTER THAT WILL BRING TOGETHER DOCTORS AND SCIENTISTS FROM AROUND THE WORLD TO TEACH, COLLABORATE AND LEARN FROM EACH OTHER.

Learn more about the St. Jude International Outreach Program at stjude.org/international.
OUR LABORATORIES MAY NOT BE IN YOUR COMMUNITIES BUT OUR DISCOVERIES ARE.

LEGACY OF SERVICE

The members of the ALSAC/St. Jude Boards of Directors and Governors are volunteers from throughout the U.S. who serve without compensation. Many represent the second and third generations of their families who have supported St. Jude through service on the board. An honorary body of emeritus members recognizes distinguished service on the Board by those unable to continue to actively participate.

ONLY ST. JUDE 2013 ANNUAL REPORT  |  Page 50
"AT ST. JUDE, WE SET THE STANDARD FOR RESEARCHING AND TREATING CHILDHOOD CANCER AND OTHER DEADLY DISEASES, BECAUSE WE WON’T SETTLE FOR ANYTHING LESS THAN EXCELLENCE FOR THE CHILDREN WHO NEED OUR CARE."

—DR. WILLIAM E. EVANS
DIRECTOR AND CEO
ST. JUDE CHILDREN’S RESEARCH HOSPITAL

"YOUR SUPPORT MEANS FAMILIES CAN FOCUS ON THEIR CHILDREN AND NOT ON LOOMING MEDICAL BILLS. YOUR GENEROSITY FREES OUR DOCTORS AND SCIENTISTS TO KEEP LOOKING FOR THE BREAKTHROUGHS THAT WILL SAVE CHILDREN’S LIVES."

—RICHARD SHADYAC JR.
CEO
ALSAC

YOU CAN HELP

St. Jude is finding the cures that save children’s lives—every day. That is because people like you support St. Jude.

Because of you, no family ever receives a bill from St. Jude. Because of you, our doctors and scientists can seek the knowledge that translates into effective treatments against cancer and other deadly diseases. Because of you, families with critically ill children have hope.

BECAUSE OF YOU, THERE IS ST. JUDE.

Visit stjude.org to join our mission today.
