## Why St. Jude?

St. Jude Children's Research Hospital is leading the way the world understands, treats and defeats childhood cancer and other life-threatening diseases. Everything we do is centered on our mission: Finding cures. Saving children. And families never receive a bill from St. Jude. We pay for treatment, travel, housing and food – because all a family should worry about is helping their child live.

By sharing our knowledge freely and exchanging ideas openly, we're inspiring more collaboration between doctors and researchers worldwide, and, as a result, more lifesaving treatments for children everywhere. Because most of our funding comes from individual supporters, we have the freedom to focus on what matters most -- saving kids regardless of their financial situation.
