

St. Jude Children's Research Hospital®

Legacy Wall

**St. Jude Children's
Research Hospital**

Finding cures. Saving children.

ALSAC • DANNY THOMAS, FOUNDER

St. Jude Children's Research Hospital®

Legacy Wall

The late entertainer Danny Thomas founded St. Jude Children's Research Hospital because he believed that "no child should die in the dawn of life." This hospital stands today as his legacy.

We are grateful that others have embraced Danny's dream and have chosen to create their own legacies for the children of St. Jude. These important supporters have decided, during their lifetimes, how they want to be remembered in the future by making a gift to St. Jude through their estate plans.

Estate gifts can take many forms, including naming St. Jude as a beneficiary in a will, savings vehicle, life insurance policy or retirement plan. Additionally, charitable gift annuities and trusts are considered legacy gifts.

Regardless of the type or amount of the gift, the names of these generous donors are inscribed on our Legacy Wall in the hospital. This wall is centrally located at the entrance to the Danny Thomas Research Center and prominently displays the names of those who have made the ultimate gift to help the children of St. Jude.

These important supporters become members of the Danny Thomas – St. Jude Society. Members are

invited to exclusive events around the country and on the hospital campus, and are also included in our annual membership listing. The inclusion of your name can help encourage others to leave a legacy gift to St. Jude, too.

In appreciation of your estate gift, and with your permission, your name and hometown will be listed on our Legacy Wall. Our hospital leaders and St. Jude families will recognize your commitment to helping children battling cancer and other life-threatening diseases.

To inform us that St. Jude is in your estate plans or for more information, call or visit **stjude.org/legacywall**.
