Thank You Letter from Bridget's Parents

Our daughter, Bridget, has always been an active girl. She loves soccer, swimming and softball. In early 2018 Bridget was diagnosed with bone cancer. There was a mass in her right distal tibia. We were devastated, but also hopeful. We were familiar with St. Jude Children's Research Hospital® and knew it was the best place for her. We were able to focus on Bridget's care and well-being since our housing, travel and care was covered by St. Jude. It was amazing to see how in tune Bridget's care team was, and it was comforting to know her doctors and nurses cared so much for her. We're grateful for everyone who cared for her, and we're thankful for people like you, who support St. Jude.

About St. Jude

St. Jude Children's Research Hospital® is leading the way the world understands, treats and defeats childhood cancer and other life-threatening diseases. It is the only National Cancer Institute-designated Comprehensive Cancer Center devoted solely to children. Treatments invented at St. Jude have helped push the overall childhood cancer survival rate from 20 percent to 80 percent since the hospital opened more than 50 years ago. St. Jude is working to drive the overall survival rate for childhood cancer to 90 percent, and we won't stop until no child dies from cancer. St. Jude freely shares the discoveries it makes, and every child saved at St. Jude means doctors and scientists worldwide can use that knowledge to save thousands more children. Families never receive a bill from St. Jude for treatment, travel, housing or food—because all a family should worry about is helping their child live.

Facts at a Glance

Families never receive a bill from St. Jude for treatment, travel, housing or food—because all a family should worry about is helping their child live.

Treatments invented at St. Jude have helped increase the overall childhood cancer survival rate from 20% to more than 80% since we opened more than 50 years ago. We won't stop until no child dies from cancer.

Because St. Jude freely shares our discoveries, every child saved at St. Jude means doctors and scientists worldwide can use that knowledge to save thousands more children.

St. Jude conducts more clinical trials for childhood cancer than anyone else.

St. Jude is where doctors often send their toughest cases, because St. Jude has the world's best survival rates for some of the most aggressive forms of childhood cancer.

St. Jude treats children from all 50 states and around the world.

Because a majority of St. Jude funding comes from generous donors, St. Jude has the freedom to focus on what matters most—saving kids regardless of their financial situation.
