

Clinical Elective

Opportunity

Pediatric Neuro-oncologic Imaging

This 2-month long elective rotation is open to the 4th year radiology residents of ACGME accredited residency programs and neuroradiology fellows.

Program Goal: To provide advanced, specialized training in imaging CNS cancers, using appropriate MRI sequences based on tumor type, imaging specific pediatric CNS tumors, and participating in scholarly activities (optional).

Trainees will gain experience in:

- Prescribing specific MRI sequences for specific CNS tumors
- Performing advanced MRI techniques
- Identifying imaging spectrum of specific pediatric tumors
- Interpreting multi-modality imaging (including PET scans) of CNS tumors
- Learning how to present imaging in multi-disciplinary conferences
- Collecting and presenting imaging data at local and international conferences
- Preparing a manuscript for submission to peer-reviewed journal (optional)

Travel reimbursement to Memphis, TN and housing are included for duration of the rotation.

To apply or for more information, please contact Asim K. Bag, MBBS, MD, Training Director, at asim.bag@stjude.org
