

Clinical Elective

Opportunity

# Pediatric Oncologic Imaging

This 2-month long elective rotation is open to the 4<sup>th</sup> year radiology residents of ACGME accredited residency programs and to pediatric/body radiology fellows.

**Program Goal:** To provide advanced, specialized training in imaging pediatric cancers, using appropriate imaging techniques based on tumor type, imaging specific pediatric tumors, and participating in scholarly activities (optional).

## **Trainees will gain experience in:**

- Prescribing specific imaging techniques for specific pediatric tumors
- Using advanced MRI techniques in the correct clinical context
- Identifying imaging spectrum of specific pediatric tumors
- Interpreting multi-modality imaging (including PET and Nuclear Medicine) of pediatric cancer
- Learning how to present imaging in multi-disciplinary conferences
- Collecting and presenting imaging data at local, and international conferences
- Preparing a manuscript for submission to peer-reviewed journal (optional)

Travel reimbursement to Memphis, TN and housing are included for the duration of the rotation.

**To apply or for more information**, please contact Asim K. Bag, MBBS, MD, Training Director, at [asim.bag@stjude.org](mailto:asim.bag@stjude.org)
